Project Management Course

OVERVIEW
Planning and leading projects is a critical skill which all managers need as more organizations use projects to implement change and innovation to get ahead of the competition or at least stay in the game. Project management competency is no longer optional and is essential for all organizations and its leaders.

PROGRAM OBJECTIVES
- Understand why business success depends on projects and what makes projects successful
- Discuss the triple constraints and other ways to measure project success
- Discuss the five project management process groups
- Discuss the ten knowledge areas of project management
- Learn key project planning concepts and tools such as the project charter, stakeholder analysis, scope definition and work breakdown structure, project scheduling, project cost estimating, quality planning, human resource planning, team development, communications planning, and risk analysis.
- Discuss Earned Value Analysis as a tool for evaluating project performance
- Discuss the role of a project management office
- Discuss the application of the Diamond Framework for adaptive project management

WHAT YOU WILL LEARN
- Project Management Overview and Project Initiation
- Project Cost Management
- Project Schedule Management
- Project Resource Management & Project Leadership
- Project Quality Management
- Project Stakeholder Management & Project
- Communications Management
- Project Risk Management
- Project Closing & Project Integration Management
- Introduction to Adaptive Project Management

KEY BENEFITS
- Learn about the project life cycle, project management process groups and knowledge areas, and best practices, that are applicable to large and small projects
- Learn general management and leadership skills that can help them plan and lead successful projects
- Learn about adaptive project management, an approach beyond the nuts and bolts of traditional project management, to help them tackle complex and strategic projects

WHO SHOULD ATTEND
The course is recommended for Mid-Level and Senior-Level Managers who are assigned to introduce strategic change or major change in their organizations. It is also recommended for those who will be assigned to manage projects in the next 3 to 6 months.
