Operations Management Development

Manage operations like a pro

Operations Management Development

Manage operations like a pro

PROGRAM OVERVIEW

Organizations in general offer a product, service or a combination of both to customers. Depending on the quality of the product or services provided, an organization builds trust with customers. Every business would like to provide the best value to their customers consistently to boost their sales.

How can organizations make sure that they can consistently provide high quality products and services to their customers? Operations Management is key in delivering this for organizations by creating the most value from the available resources and addressing the bottlenecks with short-term & long-term solutions while managing the day-to-day operations effectively & efficiently.

Managing effective operations means multiple functions are working together in sync just like following a drumbeat. This is possible when the organizations have a trained leader who understands each element of the operations. To then be able to develop their team to execute the work in synergy.

Operations in different types of organization could mean doing different things, however Operations Management focuses on ensuring smooth day-to-day work in a cost effective & efficient way while maintaining the quality of product & services, regardless of the field.

PROGRAM OBJECTIVES

For a business to be successful, managing its operations is critical. Operations Management is the heart for any organization and keeping it in good health is important for any business.

The objective of this program is to let participants understand the importance of Operations for the overall business. How they can help their organizations create value in delivering outstanding products and services in time by efficiently utilizing the available resources.

The participants will be introduced to the concepts and techniques used in design, planning, control and improvement of manufacturing and service operations.

PROGRAM FEE

₱75,000 or approximately USD 1350*

**Final USD amount may vary based on the exchange rate at the time of payment.*

Interested in early bird or group discounts?

We'd be happy to discuss flexible payment terms with you—just let us know!

KEY BENEFITS

The program will help improve product quality and services rendered to customers giving a competitive edge in the market.

Organizations have seen some massive disruptions in the supply chain in the last 2-3 years and need time to reevaluate their operations and prepare to deliver even during unexpected situations.

The program will help improve productivity and reduce costs by process mapping, identifying bottlenecks, and optimizing the processes. The program will help the employee better understand their processes, identify improvements, and contribute towards business growth.

WHO SHOULD ATTEND

The program is designed to benefit employees in Operations related roles and aspire to grow in the organization. The program will help the organization to develop their talents and prepare them for senior operations roles like Site Directors, Value Stream professionals, and leaders from various functions like Manufacturing, Quality, Procurement, Technical, Engineering, etc. The course content is designed for multinational organizations as well as SMEs. The program is suitable for manufacturing organizations, and service industries like hotels, hospitals & call centers. The following roles will benefit from the course

- Operations Manager
- Supply Chain Manager
- Production analyst / Schedule Coordinator
- Production Manager
- Industrial Engineer
- Purchasing Manager
- Inventory Manager
- Quality Manager
