Positive + Trainer Certification Program

Purposeful Training, Transformational Impact

DELIVERED BY

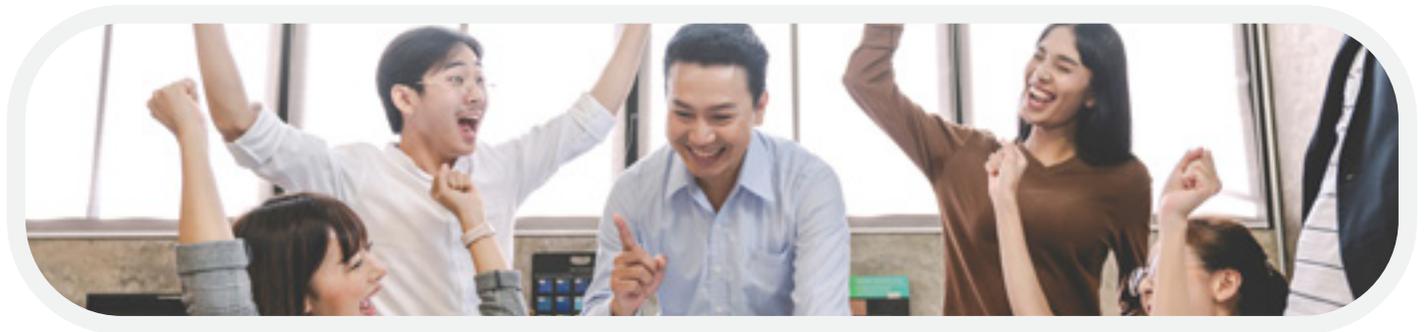

IN PARTNERSHIP WITH

Program Overview +

The [Positive Trainer Certification Program](#) is designed to equip educators with the mindset, strategies, and tools to transform teaching into a learner-centered, empowering experience. Moving beyond traditional content delivery, this program fosters an approach where students are active participants and co-creators of their educational journey. At the same time, [educators evolve into facilitators, mentors, and designers of meaningful learning experiences](#).

Grounded in contemporary learning theory and evidence-based practices, the program provides participants with the practical skills and reflective opportunities to:

01

Reimagine their role as facilitators of growth and inquiry

02

Foster deeper engagement that inspires critical and creative thinking

03

Create inclusive, adaptive learning environments where every learner thrives

04

Redesign assessment practices to support reflection, growth, and authentic learning

Whether you are a classroom teacher, school leader, or facilitator of adult learning, the Positive Trainer Certification Program offers a [purposeful, reflective, and transformative professional journey](#). By the end of the program, participants will be equipped to spark meaningful change in their classrooms, schools, organizations, and communities—[placing learning, not just teaching, at the heart of education](#).

Who Should ⁺Enroll

The program is ideal for:

School faculty and instructors

Corporate trainers and facilitators

Academic leaders and program directors

Professionals committed to advancing learner-centered education

Learning Outcomes +

By completing this program, participants will be able to:

01

Discuss how to make lectures more participant-centered

02

Discuss the advantages of problem-based learning

03

Explain how practical and experiential learning methodologies contribute to the development of learners' competencies

04

Propose approaches and strategies in delivering blended learning classes

05

Pivot lectures depending on the topic and audience at hand

06

Present various learning tools for data science

07

Share practical tips for engaging participants
